

Costos de carga de trabajo

Definir las cargas de trabajo

Servidores

Define your workloads

Enter the details of your on-premises workloads. This information will be used to understand your current TCO and recommended services in Azure.

Servers

Enter the details of your on-premises server infrastructure. After adding a workload, select the workload type and enter the remaining details.

Adjust assumptions

The following assumptions in the TCO model are industry averages accredited by Nucleus Research. To get a more accurate TCO report, update and customize these values to reflect your situation, which can vary by industry and location.

Software Assurance coverage (provides Azure Hybrid Benefit)

Enable this if you have purchased this benefit for your on-premises Windows or SQL Servers. If enabled, Azure Hybrid Benefit (AHB) will be applied to Azure estimates. AHB helps you get more value from your on-premises licenses — save up to 40 percent on virtual machines and up to 82 percent with Azure Reserved Virtual Machines (VM) instances.

Geo-redundant storage (GRS)

GRS replicates your data to a secondary region that is hundreds of miles away from the primary region.

Over 3 year(s) with Microsoft Azure, your estimated cost savings could be as

much as **USD 751,268**

Comparación de costos: Azure vs local

Total on-premises over 3 year(s)

TCO of on-premises environments tends to be driven by compute and data center costs.

USD 1,383,100
Cost over 3 year(s)

Total Azure cost over 3 year(s)

In Azure, certain cost categories decrease or go away completely.

USD 631,832
Cost over 3 year(s)

On-premises cost breakdown summary		Azure cost breakdown summary	
Category	Cost	Category	Cost
Compute	USD 962,832.91	Compute	USD 367,956.00
Hardware	USD 634,100.80	Data Center	USD 0.00
Software	USD 130,793.75	Networking	USD 5.40
Electricity	USD 42,534.36	Storage	USD 148,870.45
Virtualization	USD 105,616.00	IT Labor	USD 115,000.23
Database	USD 49,788.00		
Data Center	USD 69,824.37		
Networking	USD 214,888.31
